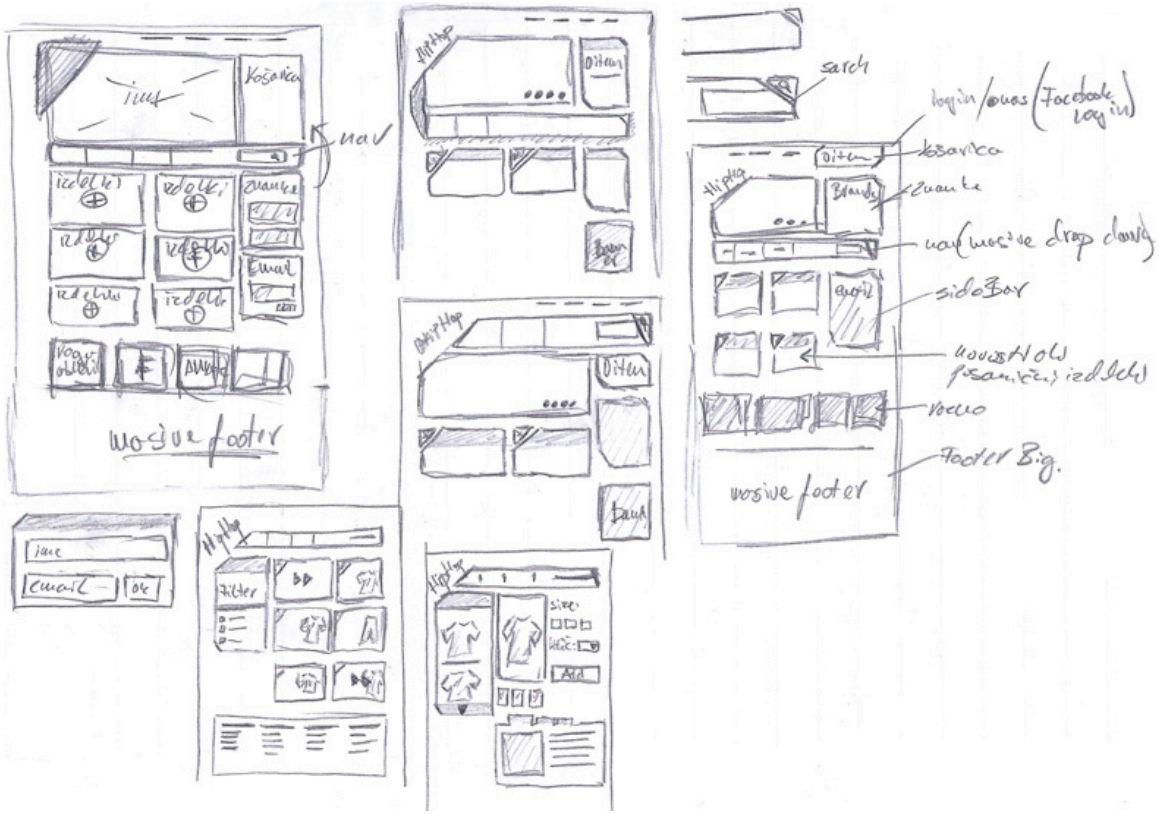
IS4300: HCI

Building Wireframes

Spring 2013

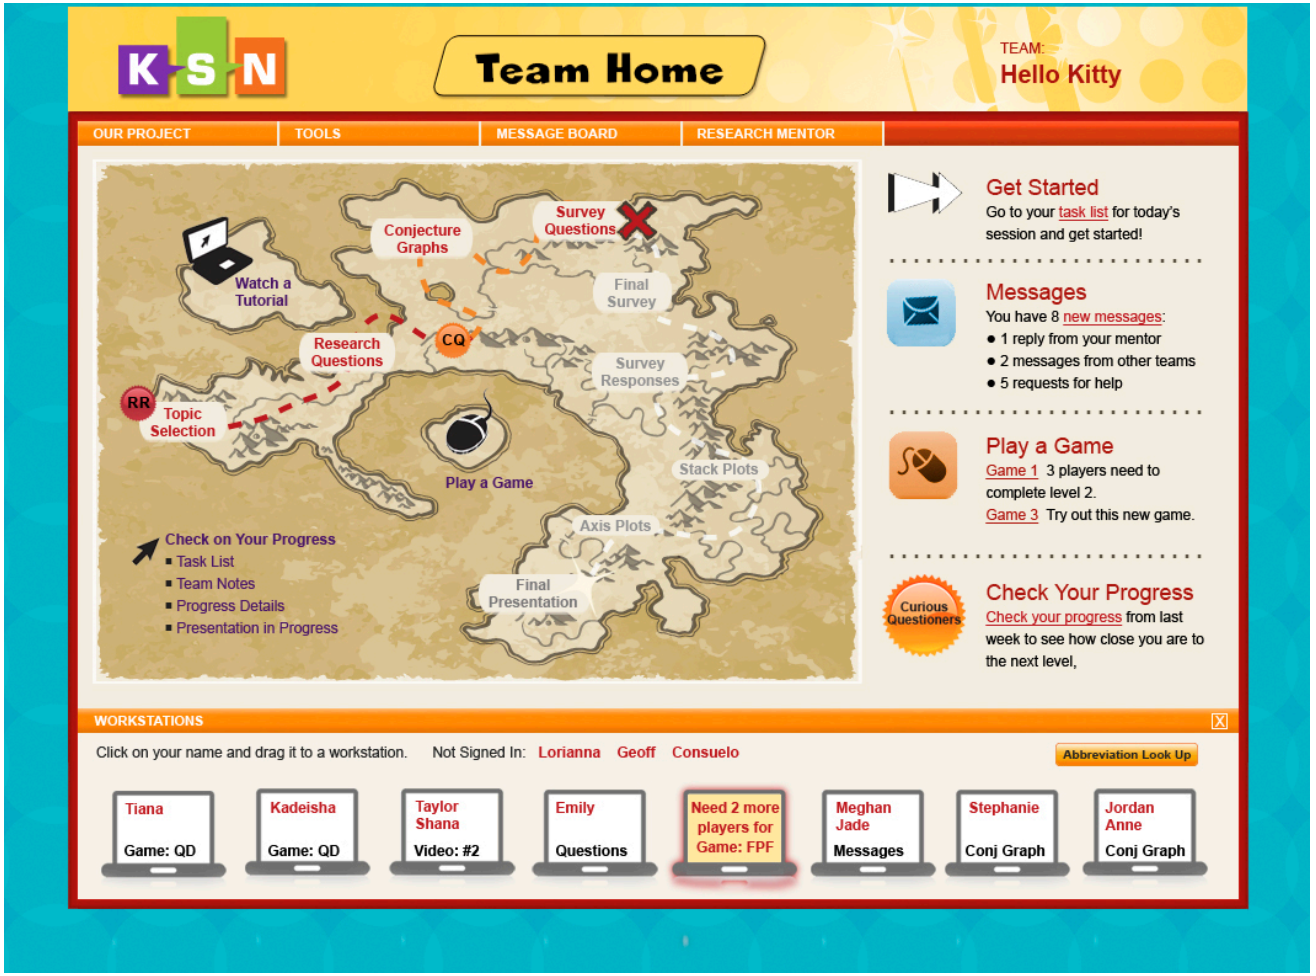
Today's Agenda

- Lecture on wireframes
  - Static wireframing example: KSN
- Wireframing tools



Low fidelity wireframe

Low fidelity: cocktail napkin wireframing. Thinking through the broad strokes, overall layout. Typically static.



High fidelity wireframe

High fidelity: layout and interaction more specific, might include styling like font choices, icon styles.

KSN Wireframing example

Online project for children to learn about scientific process and data analysis

Uses of this wireframe

- Define tasks, sequencing of tasks
- Tool for thought: for thinking through a complex activity
- Tool for stakeholders with diverse backgrounds to talk through the design and iterate upon it.
- Graphic designer, database designer and programmer based their work upon it (and other documentation.)

Preliminary sequence of tasks

Multiple users create team projects, so we had to decide which users could work on what when.

- Young people think of a problem they want to address.
- Develop conjectures about what they think will happen.
- Develop surveys to address questions (or should this happen before the conjectures?)
- Get feedback throughout the process (but when exactly should the feedback occur?)
- Gather data.
- Analyze data.
- Write up results.
- Design presentation.

Existing documentation at the time

- Prototype database designed and implemented
- Some prototype infrastructure built
- Some video and flash game content built separately.
- Some graphic design choices made.
- Data analysis prototype existed but not integrated with system database.

KSN

Our Research Plan

Hello Kitty
Research Rookies

Rank General Topic Areas

<USERNAME> Which do you rank first, second and third?

- Music
- Fashion
- TV and Movies
- Peer Pressure
- Video Games
- Exercise
- Eating and Nutrition
- Body Image
- Politics
- Environment and Wildlife
- Recycling
- Community Service
- Technology
- Social Activities

Submit

Every individual completes each web page section wireframed on this page. For Jan/Feb, if multiple users are logged on to a computer, then equivalent number of ranking/brainstorming/voting sections should appear in each section. (We do not expect multiple users to be on a computer in this session but need to design for this contigency.)

Drop downs should have the default be no selection and other options be "1st choice," "2nd choice", "3rd choice."

Votes should be added up behind the scene to calculate a winner: 1st choice =3, 2nd choice=2 and 3rd =1. Highest score wins. If there is a tie, system picks one of the tied choices.

Eventually there will be an "other" topic area that kids can fill in themselves. This option is not available for January.

Next Web Page

Brainstorm Topic Ideas

Your Team Chose BODY IMAGE!

What do you want to know about body image? Submit

gym class attendance and body shape
girls versus boys
yo! sup?
how may teens have eating disorders
teens with eating disorders don't like themselves
body image
body shape

Done with brainstorming

Select the 4 research ideas you think are best. (After everyone agrees on the four options, you will be able to rank the options from 1 to 4.)

Done with choosing

Once everyone is done with brainstorming, they click on the above "done with brainstorming" button and the "select research ideas you think are best" below section replaces the above section. Once they are done with the selecting and click, done with choosing, 4 research topics are replaced with the ranking display shown beneath. Once they click "done with rankings" they are sent to the following page.

After users submit their answers on the previous page, they should go to this page. First they will see a "loading" notification until all the votes are tallied. Then the first stage of page content shown here below:

Rank the four research ideas from one to four

Done with ranking

Next Web Page

During the initial completion of this page, one person is delegated to edit the text on this page.

Once people have complete the previous two pages of "Our Research," when they return to it, they see this section only.

THE TOPIC WE CHOSE IS: **gym class attendance and body shape**

PURPOSE
Based on the topic you chose, what would you like to find out from your survey?

The purpose of our survey is:
Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum.

SAMPLE
A sample is the group of people who will take your survey. Who will you ask to take your survey?

Our sample will be:
Lorem ipsum dolor sit amet, consectetur adipisicing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

AUDIENCE
Your audience is the group of people who will be interested in the results of your survey. Who will be your audience?

Our audience will be:

KSN

Our Predictions

Hello Kitty
status: Research Rookies

Each prediction you write should correspond to one prediction plot.

Prediction 1.

Our prediction for Plot 1 is:

We think the plot will look like this because:

The plot type is

The label on the X axis is:

This label comes from the following survey question:

The label on the Y axis is:

This label comes from the following survey question:

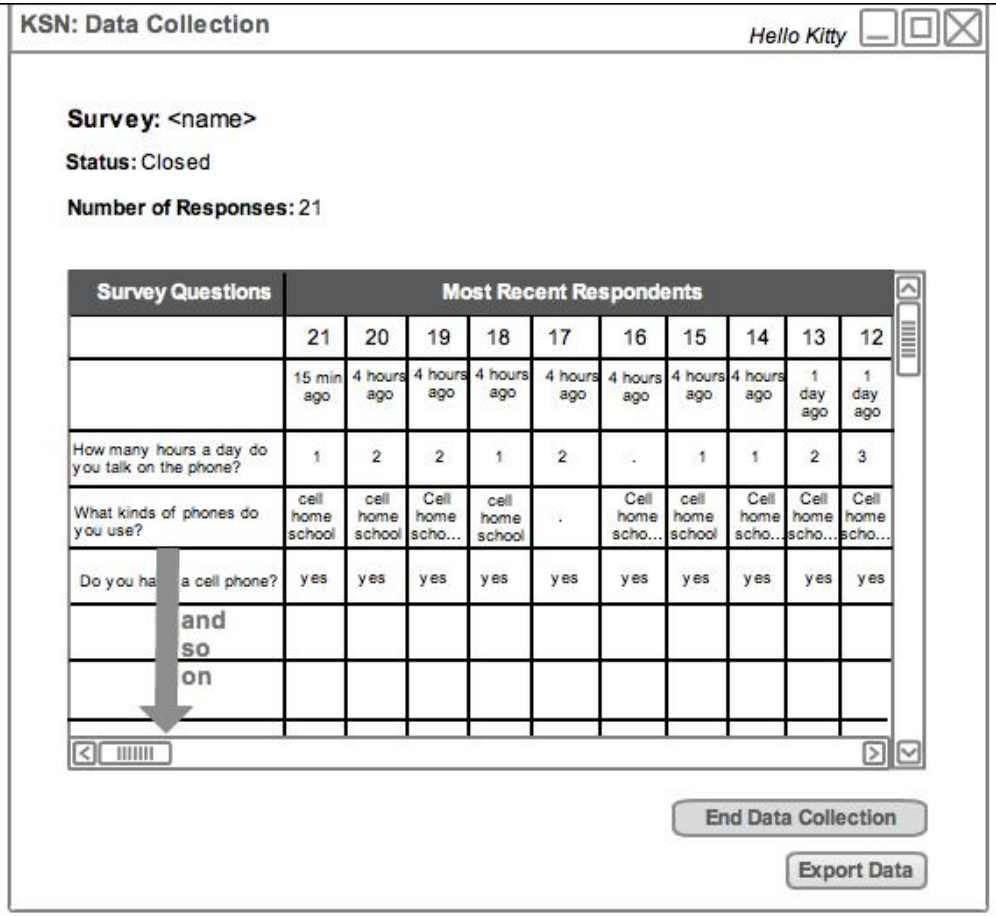
add another prediction

Save

This page is a temporary page because we do not yet have the prediction plotter. I am creating a second wireframe for what this page will look like once we have the prediction plotter.

Options for plot dropdown menu are
<blank>
Stack
Parallel Stack
Axis

Options for label drop downs are the survey questions the kids created.



Status can be Closed, Open until <date time>, Open until <number> people responded No End Date, or Close Now.

Missing data is represented in the data table as "."

Export function appears only for evaluators and researchers.

The "end data collection" button should only appear when the survey is still open.

When the text does not fit in the cells of the data table, the visibile text in that cell will end with "..." and the full text will be available with a mouseover.

In cases in which data can be described numerically or textually, the data table will display numbers with textual mouseovers, e.g., in a scale from 1 to 7, "1" would have a mouseover "not at all," and "7" would have a mouseover "very much."

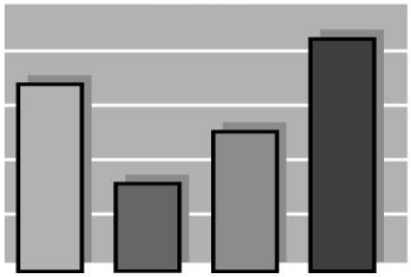
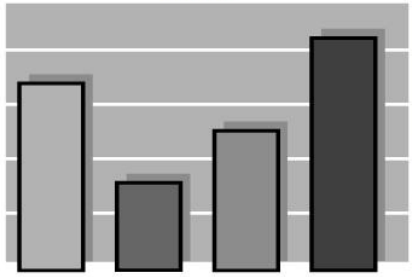
Prediction Plot



Data Plot



Our prediction for these plots was: <insert prediction here>

This data plot shows:

The prediction for this plot is accurate

Explain.

Each data plot created by the kids should show up on this page, regardless of whether it has an associated prediction plot. Plots that have associated prediction plots should show up on the top while ones without should show up on the bottom of the page.

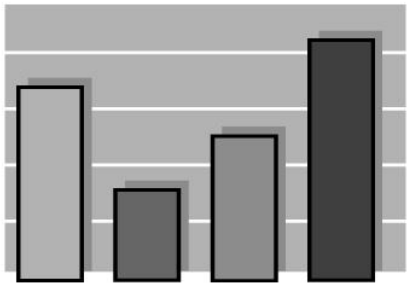
When you first come to this page, all check boxes should be unchecked and the text should read "activate this plot. The text/boxes should indicate that are not editable, perhaps by being grayed out in some way. When kids activate a plot, the text and text boxes go back to an active state. If kids have completed the prediction form for a plot and then deactivated it, the content they added should appear, but also be grayed out

Plots should display the graph itself, the x axis label, the y axis label

Options for label drop down are <blank>, "yes", "no," "not sure."

☐ activate this data plot

Data Plot



This data plot shows:

Why did you create this plot?
